PROFILE

Dedicated and hardworking B.Tech (CSE) student with strong problem-solving and time management skills. Passionate about learning new technologies and improving coding skills through regular practice. Seeking an opportunity to start a career in the IT industry.

EDUCATION

Madhuben and Bhanubhai Patel Institute of Technology

2023 – 2027

CVM University

BTech – Computer Engineering

- **CGPA:** 8.61/10.00

SKILLS

Languages : Python, Flask, HTML5, CSS3, JavaScript (React.js), REST APIs, MySQL

Tools : Git, GitHub, Visual Studio Code, XAMPP, Postman

Soft Skills : Problem Solving, Communication Skills, Team Work, Time Management, Creativity, Quick Learner, Self-Motivation

PROJECTS

Campus Placement Portal

- Developed a Web based Campus Placement Portal with multi-role dashboards (Admin, Student, Company) enabling job applications, profile management, and recruitment tracking.
- Implemented real-time analytics, smart eligibility filtering, and notification system to enhance placement efficiency.
- Built a responsive, data-driven platform using Flask, MySQL, and Chart.js for seamless user experience.
- **Click to check GitHub Repository – [GitHub](#)**

Sales Price Prediction

- A machine learning-based web application that predicts sales revenue based on advertising expenditure across different channels (TV, Radio, and Newspaper). The project features a dynamic dashboard, comprehensive analytics, and an intelligent budget optimizer.
- **Click to check GitHub Repository – [GitHub](#)**

Car Price Prediction

- CarVal is a machine learning web application designed to estimate the resale value of used cars based on various features such as year of manufacture, present price, distance driven, fuel type, transmission, and ownership history.
- **Click to check GitHub Repository – [GitHub](#)**

EXPERIENCES

CodeAlpha – Data Science Intern

March, 2026

- Worked on data analysis and machine learning tasks using Python, improving skills in data preprocessing, visualization, and model building.
- Gained hands-on experience in solving real-world problems using data-driven approaches.

LeetCode

- Practiced and solved data structure problems including Arrays, Stacks, Queues, and Graphs using Python.
